STAINLESS STEEL MOBILE INSTRUMENT CHESTS

STANDARD FEATURES:

With Lakeside's all stainless steel instrument chests, the potential applications – storage, staging, pre-op and operating room – are unlimited. Organize this chest as a small fragment cart for orthopedics. Implants and instruments together will improve efficiency and response time during procedures. Perfect for anesthesiologists, too. The locking top provides the required security. Drawer sizes make storage and accessibility to product and equipment efficient and effortless. Mobile bottom chest and stationary top chest together will be the envy of the operating room!
