to 7-1/2 Inch Plates

Lakeside E6209
Express Heat™ Mobile Plate
Dispenser, Heated, Forced Air, Two
Stack, for 8-1/4 to 9-1/8 Inch Plates

L LAKESIDE®
Ingenuity On Wheels™

Two Models, One Unbeatable Advantage: **SPEED!**

90 Minutes to Ready. Guaranteed.

Every minute counts in a busy foodservice operation. Waiting extended periods of time for heated plates slows down your service and impacts guest satisfaction. Lakeside's Express Heat dispensers use a powerful forced-air system with a 750-watt Incoloy® element to heat plates evenly and fast.

Choose the model type that fits your workflow, and get back to what matters: delivering exceptional meals on perfectly heated plates.

Heats two stacks of plates in 90 minutes

Comparison: Express Heat Models

The 90-Minute Advantage in Your Operation

The ability to heat plates in 90 minutes transforms operational efficiency. See how Express Heat's speed advantage delivers results in your environment.

1. HEALTHCARE:

Serving hundreds of visitors and staff on tight schedules demands reliability.

Regular Express Heat: Serve faster with consistently ready, properly heated plates.

Adjust-A-Fit Express Heat: Instantly fits different plate sizes, keeping service continuous and quiet while avoiding the need for multiple single size units.

2. HOSPITALITY & CATERING:

Events run on precision timing.

Regular Express Heat: Turn tables quickly with warm plates ready when service starts.

Adjust-A-Fit Express Heat: Shift from lunch to dinner or plated to buffet without retooling. One unit adapts to various plate sizes, minimizing downtime and equipment spend.

3. CASINOS & ENTERTAINMENT:

High volume requires constant readiness.

Regular Express Heat: Keep buffets and VIP stations stocked, reducing wait times and bottlenecks.

Adjust-A-Fit Express Heat: Give your back-of-house team the flexibility to handle any last second event. One system adjusts to mixed plate inventories, smoothing flow and service.

RESULTS YOU CAN EXPECT:

- Industry-Leading Speed: Hot plates ready fast.
- Operational Efficiency: Faster setup, quicker turns, and more productive staff.
- Enhanced Guest Experience: Consistently hot meals that match your quality standards.

On/Off and temperature controls

Explore Our Full Lineup

Lakeside offers a complete range of dispensers for every need, from non-heated models to specialized units. But when your operation demands the absolute fastest hot-plate readiness, nothing outperforms Express Heat. Its 90-minute cycle is designed for foodservice operations where efficiency and quality cannot be compromised.

Don't let slow equipment hold you back. Choose the leader in speed. Choose Express Heat.
